ZS/ZK Standard cylinder

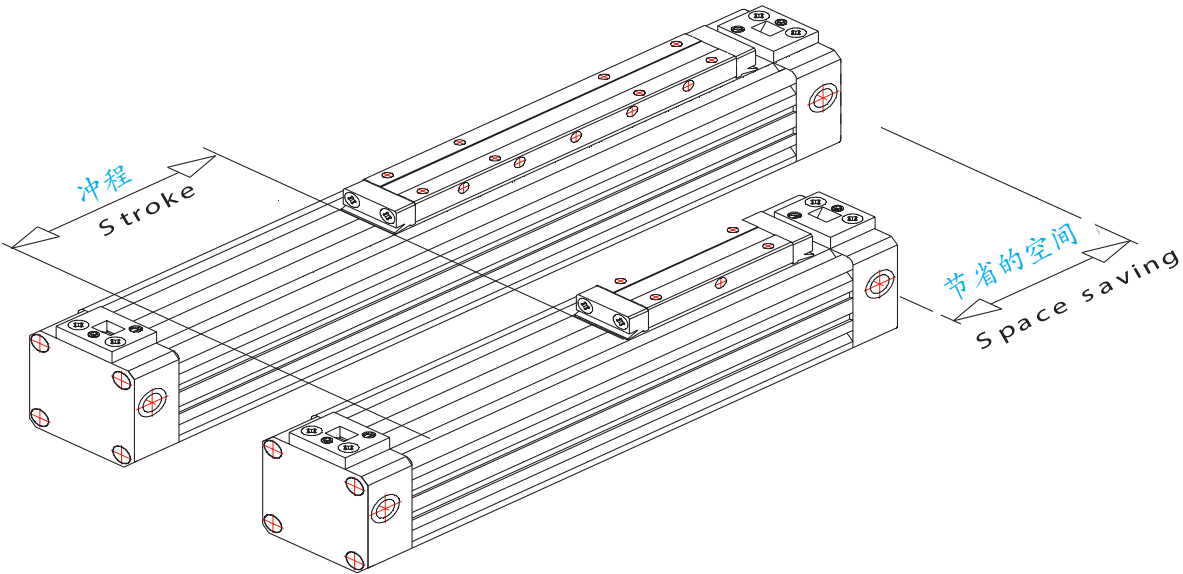

Technical information

- ZS and ZK are the basis cylinder models that almost all other cylinder models are based on.
- The ZK model, compared to the ZS model, is characterized by offering up to 40 % shorter overall cylinder length at the same stroke due to its shorter yoke (depending on the stroke length).
- The shorter yoke of the ZK model brings slightly lower performance data regarding forces and torques in comparison with the ZS model.
- ZS and ZK models are generally delivered with a yoke with an integrated magnet.
- Any additional guide systems and accessories can be installed to ZS and ZK models later on.

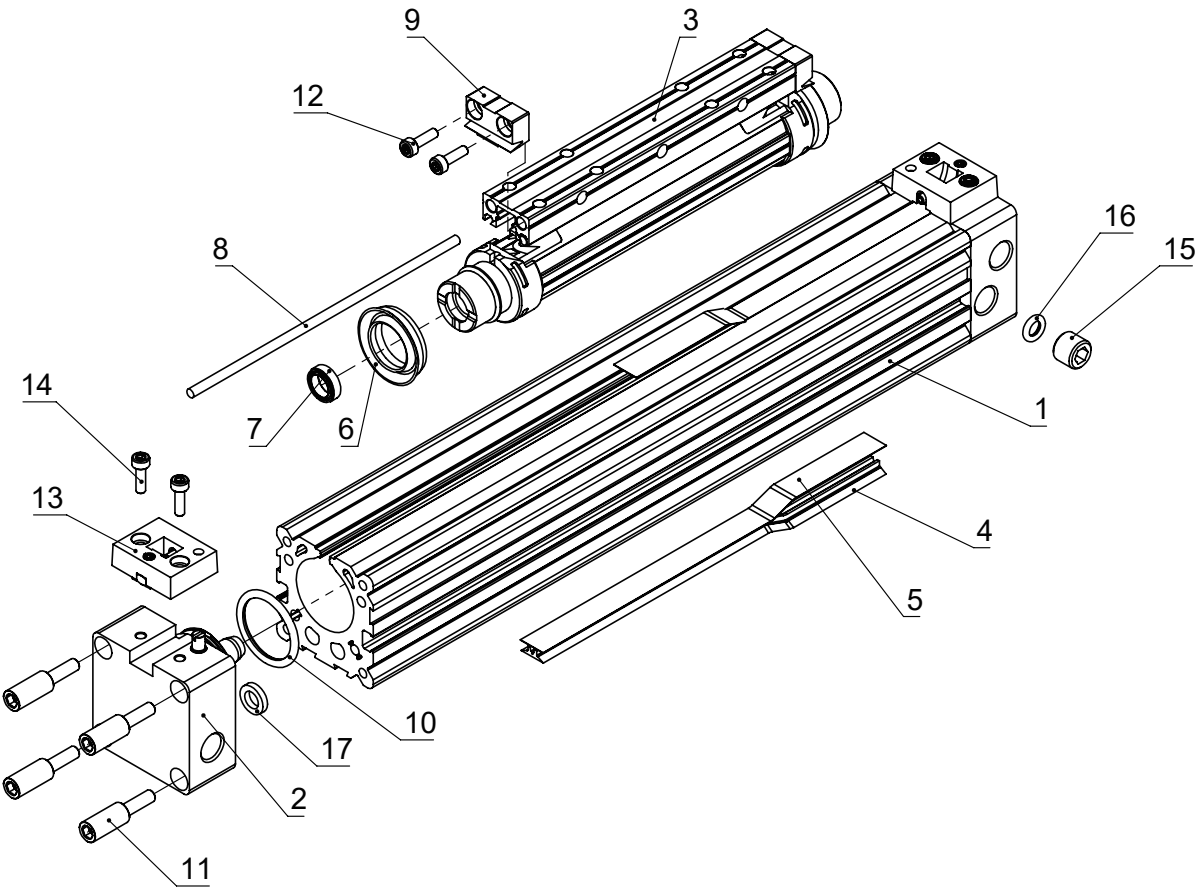

ZS/ZK 标准气缸

技术信息

- ZS和ZK气缸为基本款气缸，是所有其他型号气缸的基础
- 与ZS气缸相比，ZK气缸因采用短活塞杆设计（取决于冲程长度），因而冲程相同的情况下整体气缸长度缩短40%
- 与ZS气缸相比，由于ZK气缸采用短活塞杆设计，力、扭矩相关的性能数据略有下降
- ZS和ZK气缸一般配备有集成磁活塞杆
- 可将任一附加导轨系统或配件安装到ZS和ZK气缸
